

EXCEED EXPECTATIONS IN ROOT CANAL THERAPY:

TECHNOLOGY INTEGRATION FOR A PREDICTABLE, PROFITABLE, AND PATIENT CENTRIC PRACTICE

Sound Science[®]
ACADEMY

INTENDED AUDIENCE

Endodontists interested in learning about new technology including the GentleWave[®] System.

COURSE OVERVIEW

As new technology emerges in dentistry, questions arise for the modern endodontist: what kind of impact would this technology have on my patients, my team, and my practice? This course will answer these questions and help you gain an understanding of the latest peer-proven technologies in the endodontic space today. Hear from clinicians who have leveraged technology to impact the patient experience, create a more predictable root canal procedure, and maximize profitability for their practice — without adding unnecessary complexity to their routine.

COURSE OBJECTIVES

- Examine the GentleWave System Mechanism Of Action and the science behind its safety
- Discuss opportunities for creating a more predictable and simplified workflow through use of technological advances such as the GentleWave System
- Review the return on investment and related practice management techniques with the GentleWave System, to include scheduling, billing, and marketing
- Apply learnings in a hands-on clinical lab with instructor oversight
